PROFESSIONAL SUMMARY

Full-Stack Software Engineer pursuing B.Tech in Information Technology with hands-on experience building and deploying production web applications using JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, and WebSockets. Experienced in full-stack development, backend engineering, real-time systems, database design, API integration, authentication, Docker, Git, and CI/CD workflows. Currently working as a Software Engineering Intern on production SaaS applications for a US-based client.

EXPERIENCE

Sigma AI Labs

Jul 2026 – Present

Software Engineering Intern (MERN Stack)

- Work within a cross-functional pod team building production SaaS products for a US-based client, using MongoDB, Express.js, React.js, and Node.js.
- Collaborate with engineers and product stakeholders to develop and deliver end-to-end full-stack features.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Vite, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT, OAuth2, API Integration

Databases: PostgreSQL, MongoDB, Prisma ORM, SQL, Database Design, Query Optimization

Testing: Jest, Unit Testing, Integration Testing, API Testing

Cloud & DevOps: Docker, Docker Compose, Nginx, CI/CD Pipelines, Git, GitHub, Linux, AWS

PROJECTS

Metaspace – Real-time 2D Virtual Collaboration Platform | [Live](#) | [GitHub](#)

Jun 2025 – Present

TypeScript, React.js, Node.js, WebSockets, PostgreSQL, Docker, LiveKit

- Architected a browser-based 2D metaverse in React and Node.js supporting real-time multi-user presence, movement, and spatial interaction across virtual rooms.
- Optimized WebSocket-based presence updates to sustain sub-100ms latency, backed by a PostgreSQL data layer tracking user coordinates and room state.
- Integrated LiveKit SFU to enable spatial, proximity-based video/audio conferencing, and built a synchronized Excalidraw whiteboard for real-time collaborative drawing.
- Containerized the full application stack with Docker and deployed via CI/CD, ensuring consistent builds across development and production environments.

Muzer – Collaborative Party Music Streaming Platform | [GitHub](#)

2025

Next.js, Node.js, WebSockets, PostgreSQL, Prisma ORM, Docker, Nginx

- Architected a collaborative music streaming platform in Next.js, enabling multi-user shared spaces with real-time synchronized YouTube playback across all connected clients.
- Designed a PostgreSQL schema via Prisma ORM to support real-time playlist queue voting, reducing duplicate or conflicting queue states through atomic vote-count updates.
- Engineered a room-based WebSocket (**ws**) manager to broadcast synchronized player state changes with low latency, deployed via Docker Compose with Nginx as a reverse proxy.
- Implemented vote-weighted queue reordering logic to auto-promote tracks based on live audience consensus, improving session engagement without manual moderation.

EDUCATION

Kamla Nehru Institute of Technology, Sultanpur

Sep 2023 – Jun 2027

Bachelor of Technology (B.Tech) in Information Technology CGPA: 8.0

POSITIONS OF RESPONSIBILITY

Led campus placement operations coordinating 20+ recruiters and 300+ students; mentored 50+ peers in technical interview preparation and resume building.
